Skis	Blizzard	6mm Rocker	Frontside	121-77-103	**Thunderbird SP 7.7- 77**	160cm, 167cm	2	Control equals confidence, confidence equals fun and fun equals a great day on the mountain. The Thunderbird Sport 7.7 blends just the right amount sidecut and early-rise shape in the tip and tail, with a perfectly smooth easy flex to deliver the right amount performance for the intermediate level skier have the complete confidence and control to effortlessly explore the mountain. The wider 77mm waist helps provide more stability and maneuverability when the snow gets a little softer and little fresher. Focused on fun.
Skis	Blizzard	Rocker-Camber-Rocker	All Mtn	128-88-110	**Brahma 88**	165cm, 171cm, 177cm	3	The Brahma 88 will give you the ability to seize the snowpack throughout the most frigid temperatures and firm conditions. Compared to its wider brethren in this category, the Brahma 88 utilizes its TrueBlend Woodcore, two sheets of metal and reduced rocker profile for a better grip on harder snow but is versatile enough for a variety of snow conditions. This ski will take the energy you give it and transfer that power into the snowpack, so you can rip down the mountain with confidence and ease. As the day's smooth terrain gets eaten up by hungry skiers, the Brahma has the backbone to ski efficiently through chopped up crud, which means you'll be skiing longer (and stronger) than everyone else.
Skis	Blizzard	Rocker-Camber-Rocker	All Mtn- Freeride	136-106-124	**Cochise 106**	185cm	1	The Cochise was made for the all-mountain skier who charges from top-to-bottom all day long and walks up to an empty tram line at 3pm for another round. Whether the conditions are chalk, chunder, blower or cement, the Cochise lets you ski hard all day, without making skiing hard. Blending a modern shape with Flipcore technology and 2 sheets of metal, and at 106 mm underfoot with a rocker-camber-rocker profile, the entire mountain is truly yours to conquer.
Skis	Blizzard	Rocker-Camber-Rocker	All Mtn	136-97-118	**Black Pearl 97**	165cm, 171cm	2	The Black Pearl 97 is like the best of all worlds, offering power, stability, and float in a performance-minded all-terrain ski. The award-winning TrueBlend Flipcore is configured with a Women's specific design that has been female tested and approved within our Women2Women program. It carves groomers with perfection, charges through chopped-up crud like a boss, and makes challenging snow conditions feel like no big deal. When the big mountains are calling, the Black Pearl 97 is your confidence-building go-to.
Skis	Blizzard	Rocker-Camber-Rocker	All Mtn	127-88-109	**Black Pearl 88**	153cm, 159cm	2	f you are looking for a ski that rips on groomers and cuts through crud but won't bog you down in fresh snow, the Black Pearl 88 is your tried and true. The 88mm-waisted ski provides an unmatched level of versatility for intermediate to advanced skiers but is also strong enough for expert skiers who like to up the ante. Each ski is specifically designed by size to give that individual skier the experience they're after, whether it's casual cruising or laying it down.
Skis	Blizzard	Rocker-Camber-Rocker	Freeride	131-102-121	**Rustler 10- 102**	174cm, 180cm, 180cm, 186cm	4	The longer the ski, the wider the waist, which gives freeriders and freeride athletes more control and float, even on steep terrain. The smooth rocker-camber-rocker profile make it responsive and stable, yet super playful in softer snow and on any type of terrain. The Rustler 10 eats up chalky bumps in the steeps, floats effortlessly through stashes of fresh in the trees, and is just as comfortable in the air as it is laying trenches on fresh corduroy. The Rustler 10 is the true one-ski quiver for the progressive freeride skier.
Skis	Blizzard	Rocker-Camber-Rocker	Freeride	131-102-121	**Sheeva 10- 102**	162cm, 168cm, 174cm	3	For women who get after it in the steep and deep, navigate through the trees, crush afternoon slushy bumps and top it all off with laying down some big frontside turns, the award-winning Sheeva 10 is the do-it-all boss lady. Described by lady shredders as fun, forgiving, stable and versatile, Blizzard's Carbon Flipcore D.R.T. technology paired with a progressive shape and rocker profile deliver a confidence-inspiring, elevated skiing experience. he Sheeva 10 works hard, so you can play harder.

Type	Make	Dimensions	Rocker Type	Radius	Model	Size	Quantity	Description
Skis	Line	154-95-124	Directional Flex	Tight	**Blade 95**	176cm, 181cm	2	The skis that will change how you rip down the mountain, the Blade is your go-to ski when you want to have a ridiculous amount of fun at the resort. A Gas Pedal Metal™ layup allows these skis to charge through any condition, while a super tight sidecut offers the ability to turn on a dime. Pair this with a surprising amount of playfulness, and you've got one set of skis that will empower you to ski weird, ski different, and ski #morefunner.
Skis	Line	140-92-114	Directional Flex	Tight	**W Blade 92**	160cm, 167cm	2	Quick edge-to-edge turning capabilities paired with a tight turning radius make the Blade W the ultimate women's all-mountain ski. Rip up the groomers all morning long, and plow through the crud in the afternoon with the help of the large shovel the Blade W will tackle any terrain you throw at it. No matter what you're skiing, you'll be smiling all day long while ripping on the Blade W.
Skis	Line	131-98-119	Directional Flex	18M	**Vision 98**	172cm, 179cm	2	Created for all-mountain versatility in an exceptionally lightweight package, the LINE Vision 98 shares the same build and featherweight feel as the Vision 108 and 118 straight down to the THC Technology. Whether you're looking to rally through the freshies, arc on groomers, or motor-up skin tracks, the LINE Vision 98 is up to the task. It may be one of the lightest skis you'll get your hands on, but don't let that fool you

Skis	Line	137-104-121	Directional Flex	14.6M	**W Pandora 104**	165cm, 172cm	2	When you're not sure what weather the mountain will bring, rest easy knowing you can grab the trusty LINE Pandora 104, no matter the condition. Created with Magic Finger Carbon Filaments™, the Pandora 104 is your go-to one ski quiver. A lightweight feel and stable ride work together to make the Pandora 104 perfect for carving up morning groomers, ripping through afternoon slush, and floating through deeper days with ease.
Skis	Line	150-105-138	Directional Flex	15M	**Sakana 105**	174cm, 181cm	2	ward-winning and head-turning, the LINE Sakana is a versatile all-mountain ski like no other. Utilizing a unique swallowtail shape and camber through the majority of the ski, the Sakana can rail turns on hard snow, while an early rise tip, back-mounted stance, and wide shovel allow the skis to surf through deeper snow. A ski that floats on fresh and carves better than your Dad on Thanksgiving dinner, experience the game-changing Sakana.
Skis	Line	142-108-137	Symmetric	16M	**Bacon 108**	178cm, 184cm, 190cm	3	The all-new LINE Bacon 108. Created with all-new Thin Tips, Thick-Cut Sidewalls, and Bio-Resin technologies, the Bacon 108 is a refined and improved iteration of the coveted Sir Francis Bacon. With a versatile 108mm waist width, symmetrical flex, lower swing weight, and durability improvements, the Bacon 108 is your ticket to an all-mountain freestyle ski that can float and butter through powder without sacrificing hard-pack and park performance.

Skis	K2	138-106-127	All-Terrain Rocker	15.7M	**W Mindbender 106C**	162cm, 169cm	2	The all-new K2 Mindbender 106C W redefines all-mountain performance in a weight-conscious playful package that will inspire you to push your skiing to new levels. The 106CW was designed to excel in a variety of conditions while maintaining playful maneuverability and stability. Featuring K2's patented Spectral Braid technology, Bio Resin, and Uni-Directional Flax. The first choice for pro athletes Delilah Cupp and Evalina Nilsson.
Skis	K2	132-90-117	All-Terrain Rocker	11.9M	**W Mindbender 90C**	154cm, 160cm, 166cm	3	The Mindbender 90C W is a women's-specific ski for intermediate to advanced skiers looking for a lightweight option that's comfortable going beyond groomers. Built with our Spectral Braid technology, the 90C W utilizes torsional control to remain maneuverable and energetic without sacrificing stability. Our Aspen Veneer Core keeps you light on your feet, delivering a confident, agile carve anywhere on the mountain
Skis	K2	137-108-125	All-Terrain Rocker	22.8M	**Mindbender 108Ti**	179cm, 186cm	2	The Mindbender 108Ti delivers at any speed in any conditions. A mid-fat waist width, long turn radius, All-Terrain Rocker profile, and Titanal Y-Beam construction work together to create a stable, unflinching freeride ski that wants to be pushed. Whether the snow is soft, firm, chunky, or all of the above, you'll be ready to play through.
Skis	K2	134-99-120	All-Terrain Rocker	17.8M	**Mindbender 99Ti**	172cm, 178cm	2	The Mindbender 99Ti boasts equal parts agility and versatility. With the hard charge you'd expect from a narrower ski, the Mindbender 99Ti utilizes its Y-Beam construction to remain maneuverable underfoot. This men's freeride ski is the go-to model for confident ripping all over the mountain, and is loved by pros like Jonny Mosley and Greg Hope
Skis	K2	130-110-120	All-Terrain Rocker	27.3M	**Dispatch 110**	184cm	1	The Dispatch 110's are the perfect skis when backcountry conditions are unpredictable, but you need one ski that can handle it all. A mid-fat waist, All-Terrain Rocker, Uni-Directional Flax and Hex-Beam construction come together to keep these skis maneuverable, damp and composed in all conditions. Loved by team riders like Greg Hope and Gilles Sierro.
Skis	K2	126-73-108	Speed Rocker	15.2M	**Discruption SC 73**	162cm, 168cm, 174cm	3	It's time to start railing turns like you've always imagined. The Disruption SC's carbon I-Beam construction makes it more forgiving than its metal-laden siblings, while still delivering razor-sharp edge control and a smooth ride on the firmest of hardpack. Stepping up to a more specialized piste ski has never been more inviting.
Skis	K2	123-78-109	Speed Rocker	17.8M	**Discruption 78Ti**	163cm, 170cm	2	Strung up with our revolutionary Dark Matter Damping and Titanal I-Beam construction, this ski can bend and arc like nothing you've ever experienced. From the firmness of first chair to the uncertainties of afternoon chop, the Disruption 78Ti will redefine your perception of versatile piste performance
Skis	K2	136-112-127	All-Terrain Twin Rocker	22.9M	**Reckoner 112**	177cm, 184cm	2	You know that ski that can do it all? The one that slarves, slashes, jumps, and cuts? The one that can bounce pillows to the ground floor, hit jumps late into the afternoon sun, and charge through tracked-out pow? People say it doesn't exist, but we're here to tell you otherwise. The Reckoner 112 is all you need, no matter what the mountain throws at you. The go-to ski for team rider Karl Fostvedt

Type	**Make**	**Design**	**Sidecut**	**Radius**	**Model**	**Size**	**Quantity**	**Description**
Skis	Volkl	Frontside Hard Snow	124-76-104	16.5M	**Deacon 76 Rmotion**	171cm	1	he Master edition of the Deacon 76 with tip and tail rocker offers riders a new dimension of direct steering and tip response. With an ash core (which is usually reserved for our World Cup models), two layers of Titanal with 3D.Glass and a tailored carbon tip, this ski is packed with the collective expertise of Völkl's engineers. The tailored carbon tip produces an extremely direct and reliable tip response. The carbon fibres are positioned differently on each model and laid down at particular angles, which allows each length of ski to be tuned precisely to the needs of a highly ambitious, aggressive yet effortless riding style.
Skis	Volkl	Frontside Hard Snow	125-72-103	15.4M	**Deacon 72**	176cm	1	Ultra-agile through bends big and small, this is the ski that can do everything on the piste. You could say that the term "all-mountain" was coined just for the Deacon. Long, medium or crisp, short turns, cruising or skiing at the limits of speed, churned up or groomed slopes – if you're ambitious about carving, look no further. With a 72 mm waist, the Deacon is great for anyone who likes to carve quickly through every radius and sometimes really let rip. Fully overhauled and designed in bright colours for this winter, the Deacon 72 is impossible to miss on the slopes.

Skis	Volkl	Race System	122-69-100	13.9M	**Racetiger RC**	165cm	1	The high-tech giant slalom racer. The Racetiger RC with tip rocker allows super-sporty long turns with lots of riding comfort. This fantastic combination is made possible by the integration of the UVO 3D, 3D.Glass, Powered by Steel and sidecuts with carefully aligned flex and tip geometries. The UVO significantly dampens the vibration of the ski. The 3D.Glass construction features fibreglass layers that run three dimensionally over the ski instead of the usual horizontal-only webbing. This allows more pop as well as a sharp edge change and reliable edge grip.
Skis	Volkl	Pure Freeride	134-94-116	13-15M	**Blaze 94**	158cm, 165cm, 172cm	3	Do it all in deep snow – at 94 mm, this is a real master of every snow scenario. The introduction of the Mantra marked the beginning of Völkl's powerful freeriding ski line – for those who want to ride free without any restrictions but with all the control of a sporty all-mountain design. The new Blaze series adds a new dimension for intuitive freeriders who like performance but appreciate a playful, agile feel as well The Blaze 94 weighs just 1,566 g (@ 179 cm) and is a highly versatile ski for outstanding performance in almost any conditions.
Skis	Volkl	All-Mtn Freeride	135-96-119	16-19M	**M6 Mantra 96**	170cm, 177cm, 177cm, 184cm	4	There's only one ski that's better than the Mantra M5: the Mantra M6. The new Mantra M6 again comes with a multilayer wood core and tip and tail rocker. But in the coming season, the newly designed ski body will, for the first time, be adapted to a 3D radius sidecut concept with a tailored Titanal frame. By adapting the Titanal components to the various ski lengths and thus to the skier's proportions, not only can the tip and tail ends be weight-optimised, but the torsional stiffness can also be influenced, thereby improving the ride qualities.
Skis	Volkl	All-Mtn Freeride	129-88-113	15-16M	**Kendo 88**	170cm, 177cm	2	Whatever your style of descent – piste or terrain – the Kendo can do it. This is an all-mountain freerider with a state-of-the-art build that can be used for so many different things by experienced skiers who relish powerful turns on any terrain and on any piste. Like the new Mantra and Kenja, the Kendo 88 comes with revised geometry and a one metre shorter centre radius in its 3D Radius Sidecut. The key is that the three different radii combined in one ski make for enormously versatile cornering. The new 16 m radius in the middle further increases its radius variability.
Skis	Volkl	All-Mtn Freeride	135-96-119	14-16M	**W Secret 96**	163cm, 170cm	2	A ski for demanding freeride girls who take things to the limits under any conditions and want a ski they can rely on all the way from the top of the mountain to the bottom of the valley – and which leaves them with enough left in the tank to party hard at the après ski. Take a pinch of the powder-loving Secrets 102, add a little of the Kenja 88's piste expertise, and you get the deliciously versatile combination of the Secret 96. A new, tailored Titanal frame and tailored carbon tips give this ski the same composure, but make it a little lighter. A 3D radius sidecut lets you master turns on any terrain, and a 96 mm waist can cope with almost any depth of snow without impairing performance in either direction.
Skis	Volkl	W-All-Mtn Freeride	129-88-113	11-12M	**W Kenja 88**	149cm, 156cm	2	For women and girls who don't want to commit to just one style or one area of use. f you don't want to choose between piste and powder, between moguls and groomed carving slopes, then the Kenja 88 with its revised geometry is the perfect partner for every occasion. This all-mountain freerider with state-of-the-art build is suitable for female skiers who value performance but don't want to be confined to piste or terrain. Its impressive carving performance is due to the three different radii in the 3D Radius Sidecut.
Skis	Volkl	Freestyle	146-114-128	18-19M	**Revolt 114**	177cm, 184cm	2	The All new Revolt 114 is the culmination of a fantastic cooperation of our freeski and r&d team. The tip & tail rocker ski comes with a slight camber under the binding for that little bit of extra pressure und steering when approching the kicker. ""Incredibly versatile"" - that's one of the most often heard comments from people riding the Revolt 114. This is made possible due to the 3 radius construction and a specially shaped tip that works great for nose butters and drift turns in soft snow.
							18	

Type	Make	Design	Rocker Type	Radius	Model	Size	Quantity	Description
Skis	Armada	Freeride	AR FREESTYLE ROCKER	20.5M	**ARV 106**	180cm, 188cm	2	The ARV 106 has been our most versatile all-mountain freestyle ski since its inception. It brings an ultra-playful yet stable ride to high performance skiers tired of tossing sticks in the trash every half season. The ARV 106 features Smear Tech's edgeless base beveling in tip and tail, enhancing soft snow performance and adding additional release. It's reinforced with AR75 Sidewall construction and a Poplar-Ash Core to absorb high speed chatter and any rail, wall or concrete you can press them on. The ARV 106 is as at home surfing the white wave as it is thrashing the pro park.
Skis	Armada	Freeride	AR FREESTYLE ROCKER	17.5M	**ARW 100**	165cm, 172cm	2	The ARW 100 is our marquee women's all-mountain freestyle ski. It's unique Poplar-Ash Core reduces weight while adding pop for a stable yet responsive feel. From jumps to jibs, switch skiing to tree skiing, you can remain calm and collected, and let your style do the talking. The ARW 100 wants to do it all. Rockered tips and tails are combined with positive camber under foot to allow the ski to charge with ease through unpredictable snow and maintain a solid carve when asked to do so. Turn the whole mountain into your playground.
Skis	Armada	All-Mtn	EST ALL MTN ROCKER	17M	**Declivity 92Ti**	164cm, 172cm, 180cm	3	A full AR100 Sidewall partnered with our Articulated Titanal Banding provides confident grip on hardpack and allows power to build in a smooth yet predicable way. Pairing light-weight Caruba with a triaxial glass lay-up, we created a high-performance ski that doesn't carry extra weight. No matter what the mountain throws at you, from turning and burning on hardpack to sliding down silky pow, this one-ski-quiver will conquer anything on the hill. Rocker is paired with tapered sidecuts in both the tip and tail, providing flotation in soft snow and the versatility to make any turn shape. Camber underfoot maintains edge hold on the hard pack.
Skis	Armada	Freeride	EST ALL MTN ROCKER	21M	**Locator 88**	162cm, 172cm	2	The Locator 88 is the ultralight, precision backcountry tool primed to take you farther, faster. Set those FKTs on the uphill comfortable with the knowledge you'll be rewarded on the descents with a powerful performance to get down in style. Despite the lightest construction of any Armada ski, the Locator 88 is a confident, versatile descender with dogged edge hold when you need it most and enough rocker to keep you on top of the soft stuff. The 88 is light done right because we're only going up so we can get down.
Skis	Armada	All-Mtn	EST ALL MTN ROCKER	16.2M	**W Reliance 88C**	152cm, 160cm, 168cm	3	The Reliance 88 C enhances an airy Caruba Core with Woven Carbon Stringers to create a lightning quick ski that's at home in a variety of conditions. An 88 mm waist strikes the perfect balance for skiers who prefer an intuitive feel for higher edge angles but still want a ski that can handle variable conditions and the occasional detour into deeper snow without getting bogged down. Versatility is enhanced by pairing the EST Freeride Rocker's early rise tip with a traditionally cambered tail to help you powerfully finish turns down the fall line.

Skis	4FRNT	Freeride	MULTI-RADIUS ROCKER	19M	**Devastator 108**	172cm, 179CM	2	Year after year our Team chooses this ski as their daily driver due to its unwavered ability to charge, surf, and stomp in such a large variety of snow conditions. Our signature multi radius rocker profile enables your tips to naturally rise to the surface of fresh snow, giving you the ability to slash turns, navigate tight trees and ride away from cliff drops like a pro. Under foot you experience unmatched edge control, providing a stronger grip in firm conditions to carve turns just like a cambered ski. The Devastator will boost your confidence to ski faster, charge harder, and go bigger. Click in and buckle up for the ride of your life!
Skis	4FRNT	All-Mtn	Camber 5mm	16.5M	**MSP 91**	171cm, 175cm	2	When all of Mother Nature's signs are pointing towards a day spent on crisp corduroy, the MSP 91 is a must have. Equipped with our award winning titanal laminate construction and Maple core, stability and liveliness are two of the 91's best attributes. Its 16.5 meter turn radius provides a smooth damp ride with incredible turn initiation and carving capabilities. Whether you are looking to improve on your carving skills or you're a veteran arc'er, you'll find yourself right at home with the 91.
Skis	4FRNT	All-Mtn	Camber 5mm	18M	**MSP 99**	175cm, 181cm	2	The MSP 99 is back for the 23/24 with an updated Aspen-Maple core with titanal laminate. Relocated to our Canadian factory, this new and improved construction provides an even livelier and more responsive feel, increasing its performance everywhere on the hill. It's cambered profile and deep sidecut initiates turns with ease and instills confidence when ripping around at high speeds. When fresh snow falls and you're on the hunt for powder, the versatile waist width and gradual tip rocker provides ample float. Everything you put into this ski you get right back and more, empowering you to rip it up everywhere on the hill!

Skis	4FRNT	All-Mtn	Camber 5mm	16M	**W MSP CC 99**	159cm, 165cm	2	The MSP CC returns for the 22/23 with even more opportunity to rip it up at the resort. Its new and improved construction features an Aspen-Maple core with titanal laminate, providing more energy and a more responsive feel. The revamped MSP CC enables you to initiate the sidecut and pressure the shovel of the ski with much less effort. Its smooth, damp ride instills confidence and is just as comfortable on edge as it is powering through variable conditions. When it snows, the wide shovel and gradual tip rocker provides unwavering float when you pull up to your favorite powder stash. Everything you put into this ski you get right back, empowering you to ski harder than ever before
Skis	4FRNT	Backcountry	Camber 3mm	20M	**Raven 104**	177cm, 184cm	2	Designed and tested by Eric Hjorleifson, the Raven welcomes adventure from gladed trees to exposed alpine terrain. Equipped with our Reflect Tech™ rocker profile, your tips naturally rise to the surface of the snow, making breaking trail on the skin track and shredding powder or variable conditions easy. Its responsive nature and damp feel allow you to navigate both technical terrain and open bowls effortlessly. Go further into the mountains without sacrificing performance on the down.
Skis	4FRNT	Backcountry	Multi-Radius Rocke	30M	**Hoji 112**	184cm, 191cm	2	Eric 'Hoji' Hjorleifson designed this ski to be every skiers dream powder ski. The Aspen-Maple core with carbon fiber stringers provides ample energy at a weight that is as comfortable on the up as it is on the down. The Hoji's unique Multi Radius Rocker provides maximum control when navigating firmer snow and an even more surfy playful feel in deeper snow. Whether you are hunting out powder stashes in the trees, zooming down your favorite groomers, or heading out of bounds, you can count on the Hoji to deliver.

Skis	Icelantic	Pro Collab	Tip and Tail Rocker	20M	**Sabra Pro 107**	177cm, 187cm	2	The Saba Pro was designed alongside the Nia Pro—Unlike other pro models out there, our Saba + Nia have been designed as part of collaborative effort with all of our athletes from around the world. They took on full creative control with shape, flex, artwork, and construction while designing the ski of their dreams. The Saba + Nia feature Icelantic's Reflective Rocker profile. Reflective Rocker is a full rocker profile that mirrors the sidecut radius, creating a ski that is both playful and surfy when skiing flat, while still allowing the skier to engage the entire edge, providing the power to charge and carve the ski when needed. Designed with a long, gradual rocker profile and a balanced flex, the Saba and Nia are stiff enough to minimize chatter, while providing the skier a solid platform to stomp landings without wheeling out.
Skis	Icelantic	Freeride	Rocker-Camber-Rocker	17-19M	**Nomad 105**	176cm, 181cm, 186cm	3	The award-winning Nomad 105 is Icelantic's flagship model, best-selling ski, and the foundation of the Nomad Freeride Collection. Its 105mm platform and bombproof construction allow for great floatation and stability all over the mountain. The Freeride series features our Hybrid Flight Core consisting of poplar and paulownia wood, making the collection lighter and more poppy—allowing you to effortlessly play all over the mountain. This energetic freeride tool is best described as playful, surfy and most importantly: fun. Go ahead, see what everyone has been talking about and get on a pair.
Skis	Icelantic	All-Mtn			**Shaman 2.0- 99**	176cm, 182cm	2	
Skis	Icelantic	All-Mtn			**Shaman 2.0- 110**	182cm	1	
Skis	Icelantic	All-Mtn	Directional Rocker	15-19M	**Pioneer 96**	166cm, 174cm, 182cm	3	Pioneer + Riveter All-Mountain Collection is designed for versatility and control. Featuring Icelantic's Directional Rocker Profile, combined with 5mm of camber underfoot and a slightly tapered shape, the Pioneer + Riveter can blast through crud, accelerate in and out of turns with ease, and excel all over the mountain. The Poplar Wood Core gives the Pioneer + Riveter the strength and torsional rigidity to confidently tackle any condition the mountain throws at you. If you are looking for a one ski quiver that is powerful, versatile and responsive, the Pioneer or Riveter is the ski for you!
Skis	Icelantic	Pro Collab	Directional Rocker	17.5M	**W Nia Pro 105**	169cm	1	The Saba + Nia feature Icelantic's Reflective Rocker profile. Reflective Rocker is a full rocker profile that mirrors the sidecut radius, creating a ski that is both playful and surfy when skiing flat, while still allowing the skier to engage the entire edge, providing the power to charge and carve the ski when needed. Designed with a long, gradual rocker profile and a balanced flex, the Saba and Nia are stiff enough to minimize chatter, while providing the skier a solid platform to stomp landings without wheeling out.

Skis	Icelantic	Freeride	Rocker-Camber-Rocker	13-14.5M	**W Maiden 101**	155cm, 162cm	2	Combining design elements from Icelantic's top-selling Nomad and our signature Hybrid Flight Core, the award-winning Maiden 101 is the ultimate women's-specific Freeride ski! A rockered tip and tail along with 2mm of camber underfoot allows the Maiden 101 to excel when playing in powder, blasting through crud and having fun all over the mountain. The Freeride series features our Hybrid Flight Core consisting of poplar and paulownia wood, making the collection lighter and more poppy—allowing you to effortlessly play all over the mountain.
Skis	Icelantic	All-Mtn	Directional Rocker	13-14.5M	**W Riveter 95**	155cm, 162cm	2	Pioneer + Riveter All-Mountain Collection is designed for versatility and control. Featuring Icelantic's Directional Rocker Profile, combined with 5mm of camber underfoot and a slightly tapered shape, the Pioneer + Riveter can blast through crud, accelerate in and out of turns with ease, and excel all over the mountain. The Poplar Wood Core gives the Pioneer + Riveter the strength and torsional rigidity to confidently tackle any condition the mountain throws at you. Skis	Salomon	Freeride	Tip & Tail Rocker	137-112-126	**QST BLANK 112**	178cm, 186cm	2	We tasked our athletes with designing the most progressive and playful freeride powder ski on the mountain: meet the QST BLANK. Pillow-popping and powder-loving, the BLANK is built for deep days at 112mm underfoot. A progressive shape enhances the flotation and playfulness of your turns, while its construction provides the stability you rely on. Charge resort laps, or mount the BLANK with the SHIFT for touring.
Skis	Salomon	Freeride	Tip & Tail Rocker	136-106-123	**QST 106**	173cm, 181cm. 189cm	3	The icon of Salomon's QST line, the QST 106 is a favorite across the world. This year, we revamped the ski's shape, complimenting the classic QST layup that you rely on for power and stability. The result? A ski that does it all with style and finesse - no matter the snow, no matter the terrain. Go ahead, make the mountain your playground.
Skis	Salomon	Freeride	Tip & Tail Rocker	131-98-119	**QST 98**	169cm, 176cm, 183cm	3	From chasing natural features in the morning, to slaying glades 'til après, the QST 98 is a playful yet powerful ski. With a new, modern shape and versatile 98mm waist-width, the QST 98 rises to any challenge. Double sidewall technology transmits power to your edges, whether dropping cliffs or buttering lips.
Skis	Salomon	Freeride	Tip & Tail Rocker	136-106-123	**W QST STELLA 106**	165cm, 173cm	2	The one and only ski you'll need from opening day 'til closing. The new QST Stella 106 boasts a redefined, more playful shape that's heightened by a carbon layup and redesigned cork inserts for power and stability when charging big lines and navigating tight couloirs. If fun and stable rides are what you're after, the Stella is your perfect match.
Skis	Salomon	Freeride	Tip & Tail Rocker	131-98-119	**W QST LUMEN 98**	152cm, 160cm	2	The new QST Lumen 98 is a powerful all-mountain quiver-of-one that thrives in playful lines and shines in changing conditions. With a modern twin rocker shape and versatile 98mm waist, the ski turns effortlessly in the bumps, on piste, and in powder. Double sidewalls create trustworthy edge hold, while cork inserts and CFX layup provide stability.
Skis	Salomon	Carving	Rocker Camber Rocker	127-80-111	**S/FORCE AM 80**	161cm, 169cm	2	Designed for skiers eager to carve no matter the conditions, this ski has the perfect underfoot width for crushing your way through every turn. Combining Salomon's most progressive technologies with an attractive design, this ski won't let your skills pass unnoticed no matter the line you choose.

Type	Make	Shape	Rider Type	Flex (1-10 stiffness)	Model	Size	Quantity	Description
Snowboard	Arbor	True Twin	True Twin	3	**W- Cadence Camber**	148cm	1	The Cadence is designed specifically for women, to fit a wide breadth of riding styles. Evolve your snowboarding and being while onboard the rideable figure of power by the talented Hilary Jane. Its flex is perfect for pressing and buttering in the park, holding high speeds on resort groomers, and securing stable takeoffs and landings in the pipe and off jumps. A team favorite for good reason. Available in System Camber and System Rocker technologies. Going Deeper…
Snowboard	Arbor	Twin	Resort Mtn	4	**W- Mantra Camber**	144cm	1	Brand new to the 23/24 Lineup, the Mantra featrures a user-friendly, quique Women's Mtountain Twin shape. Its top-to-bottom rideability, friendly flex, and approchable shape give the Mantra unlimited potential all over the Mtn. Designed for carving, cruising, stable takeoffs and landings. Ready to accommodate all riding styles.
Snowboard	Arbor	Twin	Powder/ Big mtn / Resort	5	**Terra twin Camber**	155cm	1	New to 23/24 evolving its surfy, floaty predecessor with Terra Tech. Terra Twin provides added stability with increassed volume edge-to-edge. A board for backcountry freestyle with a propensity for powder performance. Trade length for volume with the all-new Terra Twin. With added chanells in the nose and tail to create an unmatched float that can turn any good day into the best day ever.
Snowboard	Arbor	Twin	Big Mtn	7	**Wasteland Camber**	156cm	1	Staple Mtn-Twin, Premium wood grain, mindfully crafted to grind, jump, carve, and cruise the entire mountain. The 4-Point System Camber is optimal at speeed, through steep and deep carves, while the system rocker provides a more catch-free, surfy performance. The wasteland is fully capable of finding all-time rides in all terrain.
Snowboard	Arbor	Directional	Big Mtn / Powder	5	**Satori Camber**	154cm	1	Balance to life and the Satori is the answer. Designed as a short/wide, pow loving board. It's freestyle focused, with a deep disecut, Grip Tech, and medium flex with a stable tail. Exaggerated uprise fenders and long-drwn out ramping nose to give it additional lift in the pow and give it a more fun, freidnly feel.
Snowboard	Arbor	Directional	Big Mtn / Resort Pow	8	**Annex Wide Camber**	158w cm	1	Expolre a beautiful middle ground of pinnacle performance in technical terrain and comfortable, precise edging in bounds. Provides a powerful torsional rebound and unmatched response on all terrain. The unique elongated nose and tapered outline coupled with the proprietary System Camber and 3D fender make this board ride almost as good as it looks.
Snowboard	Arbor	Directional	Powder / Big Mtn	5	**Single Camber**	156cm	1	A nod to the origins of float, the Single uses the ethos of early single fin suft shapeing with a voluminous nose and a tapered pintail design for clean tracking and increased stability. The tail creates the perfect angle of approach for the deepest days and added stability when pushing through the biggest pow turns. With the thunderhead tip design to add surface area for bouyancy, with notches that channel snow around its wider shape.
Snowboard	Arbor	Directional	Big Mtn / Resort Pow	7	**Bryan Iguchi Pro Camber**	156cm	1	Time tested relevance, tinmeles appearance, and shape engineered by legend Bryan Iguchi. Bryan's spanning knowledge and experience of freestyle are brought to life in his signature model. The versatility and performance and thoughtful design make it the perfect pick for optimal rideability.
Snowboard	Arbor	Directional	Big Mtn / Resort	9	**A-Frame Camber**	158cm	1	The A-Frame's instinct kicks in at the top of the Mtn. It's directional shape, mild taper and setback stance assure confortable cruising and an unmatched powder float. Engineered for high speed carves and precision control, the A-Frame features a bigger radius sidecut and carbon RWD inlays for added stability and dampening. THe optimal ride for big landing and pwering through challenging snowpack.
Snowboard	Arbor	Powder	Powder / Big Mtn	5	**Terra Pin Rocker**	156cm	1	70's inspired surf design, the Terra Pin has a brand new design for 23/24. Trade length for volume plus a tapered outline for scamless edging and a surfy ride. The all-new Terra Pin is buuilt with System Rocker, added channels in the nose and tail to create an unmatched flaost and drive that can trn any good day into the best day ever.

Snowboard	Capita	Tue Twin	Resort	6	**Super D.O.A**	161w cm	1	Designed for the intermediate and above all-terrain resort rider seeking the award-winning geometry of the D.O.A. series in a lighter, more energetic, and responsive chassis, the SUPER D.O.A. can help you go faster, edge quicker, and push yourself into new and exciting terrain.
Snowboard	Capita	Tue Twin	Resort	5.5	**D.O.A**	152cm	1	he P2 Superlight Core™ reduces weight while providing high-impact resistance and maximum pop. With additional construction technology like Fortress™ Aramid Bound Sidewalls and a high-speed Quantum Drive™ base advancing these boards beyond their modest retail price, the D.O.A. series stands proud as the ultimate go-anywhere, do-anything freestyle deck.

Snowboard	Capita	Tue Twin	Resort	5.5	**Birds of a Feather**	148w cm	1	With a medium flex that's easy to turn, this hybrid-camber, all-terrain performer has inspired countless knockoffs chasing its success. The Birds of a Feather breaks down industry barriers with a comprehensive size range, including an expanded dedicated wide offering for women with larger boot sizes.
Snowboard	Capita	DIRECTIONAL TWIN 0.5" SET BACK	Resort	5	**Outerspace Living**	156cm	1	Forgiving when you want them to be while powerful enough to handle sticky situations, these decks feature the FSC® Certified Multizone Core™, which provides resort riding response as well as performance in side-country conditions. Do you want to crush laps through the park after the powder is tracked out? If so, then this is the board for you.
Snowboard	Capita	True Twin	Park + Resort	5	**Indoor Survival**	154cm	1	With the Indoor Survival, you can unleash turbocharged hot laps on your local resort's terrain. The poppy and quick-turning freestyle board that can do it all. The Indoor Survival is one of the most versatile and beloved boards in the CAPiTA collection. The iconic name evokes emotions tied to historic sessions of our past; this technically packed series has evolved to take your riding into the future.
Snowboard	Capita	True Twin	Powder + Resort	5	**SB Powder Twin**	156cm	1	Spring Break Powder Twin. Yep, it looks like a twin tip park board but guess what, it retains many of the geometric theories that have made Spring Break Snowboards legendary in the powder–and on the corduroy. Perfect for a freestyler living in a powder zone, or just a larger rider having a hard time finding a wide-enough twin, the Powder Twin will deliver. Featuring a super-wide chassis and Surf Rocker camber profile for maximum flotation, these boards maintain the signature Spring Break super-tight six-meter sidecut to surf the waves and slash the goods.
Snowboard	Capita	True Twin	Resort + Freestyle	5.5	**Ultrafear Camber**	151cm	1	No matter your camber preference, you can now attack your local resort and terrain park with the powerful pop of its tech-packed construction and the playful freestylin' feel the ULTRAFEAR provides underfoot. The resort and park freestyle destroyer with a loose feel.
Snowboard	Capita	True Twin	Freestyle	5.5	**Ultrafear Reverse Camber**	157cm	1	For the jibbers and rail masters. The resort and park freestyle destroyer on a reverse camber platform. No matter your camber preference, you can now attack your local resort and terrain park with the powerful pop of this tech-packed construction and all the fun freestylin' feel the ULTRAFEAR provides
Snowboard	Capita	True Twin	Freestyle	4	**Space Metal Fantasy**	149cm	1	The easy-riding board that can do anything for the rider that does a little of everything. We present this as a park series for classification purposes, but in truth, it's much more than that. This very forgiving reverse camber shape provides a fun experience for beginner to intermediate riders looking to expedite the learning curve and take their riding to the next level on many different types of terrain.
Snowboard	Capita	DIRECTIONAL 0.8" SETBACK	ALL-MTN / FREERIDE	6.5	**Mega Death**	157w cm	1	For the advanced freerider capable of utilizing ultimate performance. Inspired by the legacy of the Black Snowboard of Death, yet custom designed for an unmatched ultralight and powerful performing ride, we present the MEGA DEATH—a high-end, high-tech freeride machine unlike anything else. The MEGA DEATH is quite simply the board that everyone wants, but not everyone will get to have. A truly versatile, high-performance freeride machine—ready to charge anything you dare point down
Snowboard	Capita	DIRECTIONAL 0.8" SETBACK	ALL-MTN / FREERIDE	6.5	**e Black Snowboard of Dea**	156cm	1	The advanced all-mountain technician. With legendary status as an all-terrain slayer and too many accolades to name, The Black Snowboard of Death has been continually morphed and modified in pursuit of perfection. The only element that has remained the same over the years is the name itself. This iconic CAPiTA series is packed with technology integrating post-consumer recycled plastics into an extraordinarily lightweight and powerful core alongside a Carbon Fleece Power Shield™ and Amplitex™ V-Tech Amplifiers.
Snowboard	Capita	DIRECTIONAL 0.8" SETBACK	ALL-MTN / FREERIDE	6.5	**Kazu Kokubo Pro**	157cm	1	The big mountain freestyler. Fast and powerful, this is the switchblade of powder boards. The redesigned Kazu Kokubo Pro comes in a compact chassis with a powder nose and a slightly tapered tail, making this award-winning series quick and maneuverable. This versatility is perfect for side-country powder mornings that transition to resort riding after you've tracked your secret stash

Snowboard	Jones	Surf Series	Alternative All-Mtn Charger	9	**Ultra Mind Expander**	154cm	1	The Ultra Mind Expander is a super charged alternative all-mountain board designed for high speed slashing and freeriding. We stepped up the top speed of the playful Mind Expander by adding premium materials and a stiffer flex to the Ultra Mind Expander. The Surf Camber profile and Traction Tech 3.0 give the Ultra unmatched float and edge hold while the Ash wood veneer topsheet, Basalt Power stringers, Power Core and Triax Carbon Innegra suck up chatter in rough terrain. The Ultra shares the standard Mind Expander's 3D Contour Base 3.0 and hybrid directional shape. The blunted nose, full size tail and tight sidecut offer the nimble maneuverability of a directional board matched with the freestyle abilities of a directional twin.
Snowboard	Jones	Surf Series	Floaty Fun Freestyler	6	**Mind Expander Twin**	158cm	1	Hybrid Surf Series model that blends the playful, easy going board feel of the Mind Expander with the freestyle performance of a directional twin shape. The Mind Expander Twin's fun loving personality is defined by it's friendly flex, tight sidecut, Christenson Surf CAMBER profile and 3D Contour Base 3.0. The blunted, twin shape and 3D Contour Base make riding switch and buttering pow extra easy while the narrow sidecut and Surf Camber profile offer snappy turn response. For a damp ride and confident edge control on chop or ice, the Mind Expander Twin also features Flax/Basalt Stringers and Traction Tech 3.5 edges. Riders who live to bounce down the mountain hitting every terrain feature in sight will love this new alternative freestyle board.
Snowboard	Jones	Directional Freeride	The Freeride Foundation	8	**Flagship**	156w cm	1	The Flagship excels in technical terrain and is one the most confidence inspiring free ride boards on the planet. Featuring a directional rocker profile + Traction Tech 3.0 for unmatched edge grip on hard snow and a 3D Contour Base 3.0 for epic float in pow, the Flagship carves, stomps or straight lines with unbelievable precision. The Flagship's tapered shape sinks the tail in pow for better float and quicker turns, while the Engineered Veneer Topsheet, Flax/Basalt Power Stringers and Power Core add torsional response and reduce board chatter in rough snow. The Flagship also has Float Pack inserts that give you the option of super setback stance on the deepest days
Snowboard	Jones	Directional Freeride	Modern All-Mtn Ripper	7	**Stratos**	158w cm	1	The Stratos is a hybrid all-mountain board built with the body of a directional freeride board and the spirit of a freestyle board. The Stratos has a playful board feel thanks to a narrow sidecut and friendly flex, but the 10mm of taper and 3D Contour Base 3.0 give it the float and turn performance of a pow board. The directional rocker profile and Traction Tech 3.0 keep the Stratos locked on edge accelerating into carves and the Eco-plastic topsheet and Basalt stringers add torsional response and reduce board chatter in rough terrain. The Stratos also features Float Pack inserts that offer a setback stance option for the deepest days.
Snowboard	Jones	Directional Freeride	Modern All-Mtn Ripper	7	**W Stratos**	143cm	1	The Women's Stratos is a hybrid all-mountain board built with the body of a directional freeride board and the spirit of a freestyle board. The Women's Stratos has a playful board feel thanks to a narrow sidecut and friendly flex, but the 10mm of taper and 3D Contour Base 3.0 give it the float and turn performance of a pow board. The directional rocker profile and Traction Tech 3.0 keep Stratos locked on edge accelerating into carves and the textured Eco-plastic topsheet and Basalt stringers add torsional response and reduce board chatter in rough terrain.
Snowboard	Jones	All- Terrain Charger	High Flying Performance	8	**Aviator 2.0**	157W cm	1	The Aviator 2.0 is a hard charging directional twin built for expert all-mountain riders who like to rail turns and stomp airs anywhere on the mountain. This Aviator was designed in collaboration with Jones team riders Victor de la Rue and Jimmy Goodman. What sets the Aviator apart is its FULL CAMBER profile. Victor and Jimmy swear by the power of full camber for edging on steeps and landing tricks on the tail. The Aviator also features a 3D Contour Base 2.0, Triax Fiberglass, Carbon/Innegra Reinforcement, an ECO-Plastic topsheet and Traction Tech 3.5 edges.
Snowboard	Jones	All- Terrain Charger	Versatile Freestyle Twin	7	**Mountain Twin**	154cm	1	The Mountain Twin is a versatile directional twin designed for playful shredders who want one board that can rideit-all. It's built to shred the whole mountain like it's an endless skatepark without sacrificing float in pow or stability for bombing lines. The Twin's shape features blunt tips for reduced swing weight, Traction Tech edges to keep you locked in on firm snow and a 3D Contour Base that makes every turn more effortless. With a mid-stiff twin flex and a CamRock profile the Mountain Twin excels at poppin' pillows and pressin' boxes while it's also an easy board to turn and finesse in tight terrain.
Snowboard	Jones	Directional Freeride	The Freeride Foundation	8	**W Flagship**	149cm	1	Excels in technical terrain and is one the most confidence inspiring freeride boards on the planet. Featuring a directional rocker profile + Traction Tech 3.0 for unmatched edge grip on hard snow and a 3D Contour Base 3.0 for epic float in pow, the Flagship carves, stomps or straight lines with unbelievable precision. The Women's Flagship's tapered shape sinks the tail in pow for better float and quicker turns, while the Engineered Veneer Topsheet, Flax/Basalt Power Stringers and Power Core add torsional response and reduce board chatter in rough snow. The Women's Flagship also has Float Pack

Snowboard	Jones	All- Terrain Charger	Fun Hoggin' Freestyler	6	**Tweaker**	157w cm	1	The Tweaker is a freestyle focused true twin that's built to pop ollies, toss tricks, and carve creative lines in any terrain. A True Twin shape, buttery flex and True Camber profile give the Tweaker a playful, evenly balanced board feel, but don't mistake the Tweaker for your average freestyle twin. The Tweaker's unique double radius nose and tail profile maximise the running length of the blunted shape and offer amazing float, while the V-core profiling on the Tweaker's Classic Core makes the flex softer between the feet for nimble maneuverability and stiffer in the tips for supreme stomp-ability. The Tweaker has Traction Tech 2.0 edges for added edge grip riding through rough snow, and the spooned nose and tail edges on the 3D Contour Base 1.0 reduce edge catch and make it easy to butter and board slide
Snowboard	Jones	All- Terrain Charger	Razor Sharp Resort Ripper	8	**W Airheart 2.0**	146cm	1	The Airheart 2.0 is a hard charging directional twin built for expert all-mountain riders who like to carve turns and catch air anywhere on the mountain. The Airheart is one-of-a-kind in the Jones women's line thanks to its FULL CAMBER profile. Tip-to-tail camber matched with a directional twin shape delivers phenomenal power and stability edging on steeps and stomping tricks. The Airheart is built to rip in mixed conditions and features a 3D Contour Base 2.0, Triax Fiberglass, Carbon/Innegra Reinforcement, an ECO-Plastic topsheet, and Traction Tech 3.5 edges.
Snowboard	Jones	Freecarver Series	All-Mtn Carver	8	**Freecarver 9000s**	160cm	1	The new Freecarver 9000s is a directional freeride board designed to help you carve the fastest, deepest turns of your life. Featuring a mid-stiff flex, full camber profile and a tapered directional shape, the Freecarver 9000s blends design elements from race, boardercross and freeride boards into a high powered, big turn trenching machine. The Freecarver 9000s has a long, nine meter side cut radius and long effective edge. This is a board you can lay on rail and lock into huge GS turns like a freight train barrelling down the tracks.
Snowboard	Jones	Hovercraft Series	All-Conditions Charger	7	**Hovercraft 2.0**	156cm	1	The Hovercraft's new shape keeps the floaty nose, compact tail, directional rocker profile and long sidecut that made the original model so nimble and stable, but its been supercharged with 12mm of spoon bevel in the nose for lightning fast turn intiation and a glide accentuating, speed boosting 3D hull in the tail. The new Hovercraft is also built with recycled materials from old snowboards making it the most responsibly produced board in the Jones line.

Type	Make	Shape	Rider Type	Flex (1-10 stiffness)	Model	Size	Quantity	Description
Snowboard	Never Summer	DIRECTIONAL	HARD CHARGING FREERIDE	8.5	**Valhalla**	153cm, 160cm	2	We've always been known for powerful freeride boards, and the Valhalla takes it to the next level. A firm flex combined with one of the most innovative profiles in snowboarding — the Triple Camber Fusion — allows this hard charging board to hold an edge even in the iciest conditions. A set-back stance, unique bat tail shape, tip to tail Recluse Carbon Web, and 7mm of taper keep the nose floating in deep powder and the tail powering through.
Snowboard	Never Summer	DIRECTIONAL	ALL MOUNTAIN FREERIDE	8	**Proto FR**	156cm	1	This directional board is built for the rider seeking the best performance on groomers, bowls, trees, and steeps. The FR features a ¾" setback, 5mm of taper and Front End Rise and Float Mechanics for float in deep powder and slush, while Triple Camber allows for unsurpassed carving power. With a tech package of carbon and damping elements to rival NASA, the Triple Camber Proto FR has quickly climbed the ranks to become Never Summer's flagship freeride board.
Snowboard	Never Summer	TWIN	ALL MOUNTAIN	6	**Proto Synthesis**	155cm	1	Loaded with all the technical features, the Proto Synthesis is the top selling board year after year for a reason. The mid-flex all mountain freestyle true twin is perfectly balanced for spins, riding switch and stomping the biggest tricks. Shockwave Rocker Camber allows for pop, boost in and out of turns and vice like edge hold while maintaining natural float and pressability. Perfect for riding anywhere on the hill, the Proto Synthesis makes for a smooth ride with minimal chatter, while staying crisp and powerful.
Snowboard	Never Summer	DIRECTIONAL	ALL MOUNTAIN FREERIDE	8	**W- Lady FR**	144cm	1	A mash up between the Lady West and the Proto FR, the top selling Lady FR is the bomb! An exceptionally well rounded, technologically advanced freeride board for the lady rider who rips the biggest terrain. Three camber zones in the Triple Camber Fusion create ultimate edge hold and power, while a setback stance, early rise nose and 5mm taper create effortless float in powder with stability at speeds. Not to mention, it's beautiful
Snowboard	Never Summer	TWIN	ALL MOUNTAIN	6	**W- Protosynthesis**	148cm	1	The Women's Proto Synthesis is the ultimate all mountain freestyle board for the hard charging lady rider who rides fast, carves hard, laps the park, spins off of side hits and can do it all switch. The Proto specific Shockwave Rocker Camber allows for an explosive store of energy, performance and power, while still maintaining that surfy, floaty, forgiving feel that Rocker Camber is known for. This is the preeminent women's all mountain true twin
Snowboard	Never Summer	DIRECTIONAL	ALL MOUNTAIN	5	**Snowtrooper**	157w cm	1	The Snowtrooper is the all mountain equalizer and a great board for any riding style and ability level. It features our Original Rocker Camber Profile for amazing float and turn initiation, amid-flex for all mountain versatility, with the natural feel of a slightly setback stance and symmetrical shape. It's the Swiss Army Knife of snowboards.
Snowboard	Never Summer	DIRECTIONAL	DO EVERYTHING VOLUME BOARD	6	**Shapeshifter**	153cm	1	As part of the Shaper Series, the Shaper has always been one of the most versatile tools in snowboarding. Now, with an upgraded nose shape, the Shaper metamorphosis — the Shapeshifter — continues to evolve. Go from powder to trees, link lines through the park, there is nothing this board cannot handle. A centered stance allows the ability to ride switch and regular, while 10mm of taper and Fusion Rocker Camber create insane float for a twin. On a deep day, set your bindings back to the Blower stance. With more surface area now in the nose and a steeper kick, the new Shapeshifter is revolutionizing the all mountain game.
Snowboard	Never Summer	DIRECTIONAL	SEDUCTIVE CARVER	7	**Swift**	158cm	1	Swift snowboards were the inspiration for the Shaper Series. 20mm of taper, a mid-firm flex and Fusion Rocker Camber allow for awesome everywhere performance, in or out of powder. Now, with new aesthetics on nose and tail and the same smooth, surfy, all mountain functionality you've grown to love, this is the powder board you'll choose to ride in all conditions.
Snowboard	Never Summer	DIRECTIONAL	SMOOTH MULTI-TASKING CARVER	5	**Harpoon**	156cm	1	The ultimate, volume shifted, surf inspired Harpoon is the ultra-versatile option for a dynamic ride in any condition. 13mm of taper, Fusion Rocker Camber and a setback stance allow for charging, laybacks, bank slashing and quick edge to edge transitions, with effortless float, powerful edge grip and a smooth ride for a surfy feel anywhere on the hill. Downsize 3-5cm for added agility through the trees.
Snowboard	Never Summer	DIRECTIONAL	LIFE CHANGER	5	**W- Harpoon**	144cm	1	The Women's Harpoon is the ideal board of choice for the rider who wants to surf the entire mountain. 13mm of taper and Fusion Rocker Camber allow for a smooth, playful ride, with performance driven edge hold and versatility, whether it's ducking in and out of trees, slashing banks, carving trenches on groomers, or floating in powder. The volume shift allows a rider to downsize 3-5cm.
Snowboard	Never Summer	DIRECTIONAL	ALL MOUNTAIN PERFORMANCE	7	**Cougar**	156cm	1	We've continued to expand on the Triple Camber innovation since its inception. The brand-new all mountain Cougar is equipped with cutting-edge Recurve Triple Camber — Triple Camber drawn into a camber-dominant profile. Pressed in the same shape as the former Hammer, riders will experience the familiar feel of a mid-flex, directional, 5mm tapered board but now with a powerful new store of energy. The performance-oriented Recurve Triple Camber allows for better edge hold than traditional camber, with explosive pop and boost in and out of turns, while maintaining superior float, forgiveness, and versatility.
							12	

Type	Make	Shape	Rider Type	Response	Model	Size	Quantity	Description
Snowboard	RIDE	Tapered Directional	Big-Mtn Charger	Aggressive	**Commissioner**	157w cm	1	The Commissioner is made for a rider that demands the ultimate high-speed performance. This board will go as fast as you want to without flinching. From powder and groomers to chop and chunder, the Commissioner will power through all of it. We've used every technology available to make sure this board holds up to the most demanding speed freaks on the mountain. A Tapered Elliptical Progressive Sidecut allows for exceptional turn initiation and follow through. A laser cut aluminum/carbon fiber topsheet increases high-speed control. A 100% Paulownia core reduces weight and increases flex properties for snappier turns. The low-friction Race Base is made from a carbon-infused sintered base material to ensure a fast ride. The Commissioner is designed for intermediate to high-level riders seeking high-speed all-mountain terrain.

Snowboard	RIDE	Tapered Directional	Freeride	Aggressive	**Mtnpig**	160w cm	1	Designed for high-speed turns and the most aggressive of the Pig series boards, the MTNPIG features split tail tech that allows for a more dynamic turn shape and board flex through turns. Ride the MTNPIG in your standard board length—unlike the rest of the Pig series, we don't suggest sizing down on this model. The half-moon split tail shape helps it sink in deep snow while providing a long effective edge, increasing overall edge hold for sketchy situations. Tapered Linear Quadratic sidecut allows for smooth turn initiation and powerful support through the turn without losing grip. Carbon Slim Walls reduce weight, increase damping, increase energy transfer to enhance response and stability while Carbon-Infused Glass provides extra pop. The MTNPIG is running wild and fast through the mountains, growing fat on powder, and should only be approached by an advanced rider.
Snowboard	RIDE	Tapered Directional	Freeride	Aggressive	**Peace Seeker**	151cm	1	The Peace Seeker is designed to ride all over the mountain with a focus on power and drive. The unique Bi-Radial sidecut design offers the lightning-fast turn initiation of our pig models and the shape and construction allow for limitless support off the tail for longer more sustained turns. The longer nose shape eats up high frequency vibrations and keeps the nose floating above powder and chop at top speed. Our new glass pedal construction and tail design helps to squeeze every last drop of power out of your turns. Forget what you think about shorter snowboards and prepare to have your mind blown. This board is exactly what you'd expect, fast precise and smooth.
Snowboard	RIDE	Tapered Directional	Big-Mtn Charger	Aggressive	**Deepfake**	161w cm	1	The all-new unisex Deep Fake lives up to its name. Designed for stability and quick edge to edge control in all conditions. With a directional extra camber profile this board is built for stability and pop while giving just enough rise in the nose to float on those deeper days. The Deep Fake is designed to be ridden in a standard length, no downsize needed. The tapered linear quadratic sidecut is designed for smooth turn initiation and powerful grip through turns without washing out. Deep Fake features the brand-new Metal Slim Wall construction, a section of titanal metal layered with urethane running the edge of the board, increasing dampening, durability, and responsiveness.
Snowboard	RIDE	Tapered Directional	All-Mtn	Aggressive	**Superpig**	151cm	1	The SUPERPIG infuses high-end tech into our best-selling WARPIG shape for an elite all-mountain deck. If you find yourself seeking out something big and bad, avoid the other pigs and take shelter with the SUPERPIG, because this board is built like a brick shithouse. The SUPERPIG is the same shape as the WARPIG, just with a lot more tech and a little bit of camber. Size the SUPERPIG down 6 to 10cm's from your standard size because of its innovative shape. The SUPERPIG rides like a very angry WARPIG. This board is made for the demanding rider that wants the aggressive thrash style of the WARPIG with camber and a little more stiffness. Don't let the shape fool you—this board will go anywhere and do anything. Of course, it will still ride powder with its short, wide shape, but you'll be really impressed at how fast the SUPERPIG goes from edge to edge on hardpack and the pop the camber provides.
Snowboard	RIDE	Tapered Directional	All-Mtn	Aggressive	**Berzerker**	156cm	1	You'll be impressed at how smooth the transition between turns is because of the tip rocker and a small amount of taper in the tail that improves edge-to-edge speed and float in powder. The Tapered Quadratic Sidecut has been enhanced to improve stability and edge hold. Carbon Slimerods® 2.0 have carbon for pop and a urethane core to smooth out the landings. The Berzerker is built for an all-mountain rider looking for performance. Like a Viking longship, the Berzerker is designed to sail in the shallows or plow through the deep, cut through ice, and take you to snowboard Valhalla. Pay attention to the waist width, because the standard sizes run a bit narrow and are optimized for a smaller boot.
Snowboard	RIDE	Tapered Directional	All-Mtn	Medium	**Warpig**	154cm	1	The WARPIG sees the entire mountain as an opportunity to thrash at full speed. Slim Wall is the evolution of Ride's Roll-in Construction to its most extreme limit. By creating a fully 3-D composite structure over our proprietary Slimewall® material, this revolutionary technology results in more efficient energy transfer, lighter weight constructions, and even better damping. The WARPIG shape has won multiple snowboard tests for both all-mountain and freestyle categories, which is a rare feat in modern snowboarding. The versatility of the WARPIG is unmatched. This board will allow you to lay down carves, hit huge jumps and ride big mountain lines. A Tapered Bi-Radial Sidecut maximizes grip and allows the WARPIG to transition from edge-to-edge like a traditional narrow snowboard while getting the float and stability of a wider modern deck.
Snowboard	RIDE	Asym Twin	All Mtn Twin	Aggressive	**W Benchwarmer**	142cm	1	The all new Benchwarmer is an aggressive twin shape suited to riders seeking hardpack performance in the park. The Benchwarmer offers our most aggressive camber profile for the riders demanding a precise and crisp ride. The Benchwarmer is at home on the big line of the park and on firm snow. The Twin Hybrid Camber provides stability for jumping as well as aggressive high-speed turns. Asymmetric shaping improves heelside turn initiation and control with different radii for the heel and toeside edges. Carbon Array 3™ gives you extra pop without adding stiffness. New Carbon Slim Walls reduce weight, increase damping, increase energy transfer and enhance response stability and durability. The Benchwarmer is a performance-focused twin suited for intermediate to advanced riders looking for hard snow performance in a snappy, predictable twin shape.
Snowboard	RIDE	Tapered Directional	Freeride	Medium	**W Phychocandy**	146cm	1	The PSYCHOCANDY has additional sizes this year to accommodate all riders. The shape is based on the innovative WARPIG, so the board is designed to be ridden 3 to 6 cms shorter than your standard board and approaches the mountain with the same ideology attitude that the WARPIG is known for. A Tapered Bi-Radial Sidecut maximizes grip and allows the PSYCHOCANDY to maintain speed in all conditions. Carbon Slimewalls® enhance response and stability. The PSYCHOCANDY is a directional all-mountain board designed to ride like a WARPIG so you can tackle any and all terrain the mountain has to offer, be it park, pipe, pow or slush.
Snowboard	RIDE	Asym Twin	Resort Twin	Medium	**Zero**	154cm	1	The all-new Zero is a unisex snowboard that knows no boundaries. It can be ridden by anyone, anywhere, at any time, thanks to Twin Hybrid Rocker and Asymmetrical Quadratic Sidecut. The timeless graphic is a throwback to snowboarding's days of classic, simple and unique look but it's packed with technology to mirror today's landscape of innovation, with features like Flat Kick Tips on the nose and tail and a Performance™ Core to give you extra stability in the park and the streets. A favorite of team riders Jill Perkins and Reid Smith, the Zero is the next big thing in the RIDE line.
Snowboard	RIDE	Asym Twin	All Mtn Twin	Mellow	**Twinpig**	156w cm	1	The TWINPIG is a twin version of our most popular WARPIG model. Our engineering team took what we liked about the versatility and aggression of the WARPIG and packaged it in a twin shape for someone looking for more freestyle performance while still approaching the mountain with a "thrash everything" mentality that the PIG series is known for. Size the TWINPIG down 3 to 6 cms from your standard twin to take advantage of its unique shape and profile. The TWINPIG isn't as wide as the WARPIG, but it's still wider than a traditional twin shape. Slim Wall provides a more efficient energy transfer, lighter weight constructions, and even better damping underfoot. The asymmetrical shaping improves heelside turn initiation and control with different radii for the heel and toeside edges.

Type	Make	Shape	Rider Type	Flex (1-10 stiffness)	Model	Size	Quantity	Description
Snowboard	Rossignol	Directional	Powder/ Big Mtn	6	**XV Sushi Wide**	145cm	1	A tribute to the intersection of snow and surf with a nod to retro Japow slashing style circa 1990, the XV Sushi features a throwback directional shape and new graphics. Built to three-time Freeride World Tour winner Xavier De Le Rue's spec, it delivers effortless powder-slashing fun and on-demand edge control for a smooth, versatile ride in all conditions. AmpTek Elite features 60-100% camber with an applicable percentage of rocker at the extremities, offering explosive edge grip, pop and stability
Snowboard	Rossignol	Directional	All Mtn	7	**ONE Wide**	153cm, 157w, 165w cm	3	Directional All-Mountain Flex – Rossignol's Directional All-Mountain Flex profile is stiff under the back foot for control with a stiff waist for stability at high speed. A softer flex under the front foot delivers easier turns and maneuverability. Moderately stiff flex provides plenty of power and pop for aggressive all-mountain riding. traditional sidecut between the inserts fuses with multiple reverse sidecuts toward the tip and tail, providing real time sidecut adjustment to the ride, ie. longer when faster, shorter when slower, and delivering the perfect cut at all times.
Snowboard	Rossignol	Twin	All Mtn	8	**Revenant**	154cm, 159w cm	2	The Revenant delivers surfy, next-generation freeride performance with a zest for powder and all-mountain riding. RadCut design blends traditional and reverse sidecuts with a flat base for playful turning and seamless edge transitions. Serrated edges add extra control in hard snow, while a twin all-mountain camber profile maintains explosive power and pop creating a board that rips with loads of energy. Lively Pop, Great Balance Twin All-Mountain flex maximizes pop and balance for freestyle riding. All-Mountain Power and Stability. Mid-stiff flex for a stable blend of power and forgiveness for all-mountain freestyle riding.

Snowboard	Rossignol	Directional	All Mtn	3	**Evader**	149cm, 155w cm	2	Versatile, forgiving and fun, the men's Rossignol Evader Snowboard is an all-mountain ride for building skills and expanding your range. The right combination of rocker and soft flex makes for a maneuverable, catch-free ride that lets you push into new terrain and explore the mountain in any snow conditions. Stability and Control Directional All-Mountain flex provides increased control on back foot and high stability for smooth turn initiation. All-Mountain Progression and Forgiveness Softer flex offers ease of ride, gentle grip and superior shock absorption.
Snowboard	Rossignol	Twin	All Mtn	9	**Juggernaut Wide**	158w, 161w cm	2	Stiff under the binding areas for punch and grip underfoot with a stiffer waist for stability at high speed. Twin Freestyle Flex – Stiffer under the feet for pop and balance, with a softer waist for easy manipulation and control. 5S Serrated Edges – Rossignol's exclusive edge technology offers five, smaller points of edge contact (one between the inserts and two on either side of the inserts), improving bite and grip along the entire edge for better stability.
Snowboard	Rossignol	Directional	All- Mtn / Freeride	7	**W After Hours**	145cm, 149cm	2	eveloped with four-time Freeride World Tour champion Marion Haerty, the After Hours Snowboard is designed for the hard-working all-mountain woman. It delivers a playful twin-like feel in the powder and stands up to full-send mode, carving packed snow and traversing hard conditions with confidence. Smooth Ride, Focused Edge Control L.I.T.E. Grip enhances edge pressure on toe and heel sides when you need it most. Lively Pop, Maximum Stability Twin All-Mountain flex maximizes pop and balance for all-terrain freestyle riding.
Snowboard	Rossignol	Twin	Freestyle / All Mtn	7	**W Diva**	140cm, 144cm, 148cm	3	esigned for women who charge hard everywhere on the mountain, no matter the conditions, the 2021 Diva comes with a new aggressive true twin bluntness shape that screams All-Mountain Freestyle performance. With a strong twin freestyle flex and award wining Serrated Edge technology, the DIVA bites down on firm snow and ice while our industry-first L.I.T.E. Frame technology ensures full-length shock absorption and stability for playful board control and the ultimate, go-anywhere women's all-mountain ride. Explosive Pop and Stability AmpTek Elite Rocker maintains explosive pop and edge-gripping stability.
Snowboard	Rossignol	Directional	Freestyle / All Mtn	5	**W Airis**	143cm, 146cm	2	Designed with all-mountain freestyle snowboarding in mind and targeted at mid to advanced riders. The AIRIS' balanced twin flex with Serrated Edges and Basalt and Kevlar® fiber reinforcement ensure confident grip while flowing smoothly edge-to-edge; while our most versatile AmpTek rocker/camber profile supplies the right blend of power, pop and float so this AIRIS remains friendly wherever you ride. Confident Edge Control 5S Serrated Edges enhance edge grip for confident carving with a smooth feel. Balanced Maneuverability and Grip RadCut turn technology allows playful ease-of-use at slower speeds and full-length edge grip at higher speeds.
